INFORMATION TECHNOLOGY PATHWAY

What are Career Pathways?

Career Pathways are a sequence of training and education programs designed to develop a person’s academic and technical skills. By obtaining stackable credentials and developing new skills a worker can advance over time to successively higher levels of education and employment in a given industry or occupational sector.

Understanding the Basics

Soft skills, such as interpersonal skills, professionalism, and dependability, are important in all industries and occupations. Information Technology careers often involve interactions with clients and team members so good communication skills and maintaining a professional demeanor are important. With technology constantly evolving and new innovations being discovered, a willingness to learn and apply new knowledge and skills is crucial for employment success in this industry.

Information Technology also has a set of industry-wide technical competencies that represent the knowledge and skills needed to be successful in these industries. Knowledge of databases, applications, networks, telecommunications, and software are important in this industry. IT professionals need to be able to provide assistance and technical support to customers and clients. Ensuring products and services comply with legal and regulatory requirements and applying critical and analytical thinking to address problems are some of the skills needed for success in this industry.

STEM Career Pathways

Science, Technology, Engineering and Mathematics (STEM) pathways are usually technical in nature, and play a key role in developing new products and technological breakthroughs. STEM occupations are some of the most in-demand and highest paying jobs in Missouri.

Science: Diverse occupations in Physical, Life and Natural Sciences. Science workers can be involved in research, development, and design; as well as outdoor field work.

Technology: Data connect people and businesses on a global scale, and an unprecedented number of firms need information technology employees.

Engineering: Occupations, including drafters, technicians, and engineers, develop and test new products we use every day.

Mathematics is as part of many occupations and can be used to analyze data and help solve real-world problems in engineering, sciences, or other fields.

Why consider a career in Information Technology?

There is a high demand for Information Technology (IT) occupations across the state of Missouri. IT professionals interact with every level of an organization’s structure, and are drivers of innovation at most businesses. Firms of all types and sizes need help with information technology products.

Missouri employs over 84,000 people in IT occupations in a wide variety of industries. Wages for these occupations are higher than average; the mean salary for Computer and Mathematical occupations in Missouri is $78,690 compared to a state average of $45,520 for all occupations (Bureau of Labor Statistics, 2017 OES).

Long-term employment projections from the Missouri Economic Research and Information Center show Computer and Mathematical occupations are projected to grow 11.2% from 2014-2024, nearly double the 6.1% growth rate of all occupations.

High wages and projected growth make IT occupations a good career choice.
**SKILL PROFILE**

**IT Infrastructure Library (ITIL)**

ITIL (Information Technology Infrastructure Library) is a set of detailed practices for IT service management (ITSM) that focuses on aligning Information Technology (IT) services with the needs of business. ITIL consists of five broad components: Service Strategy (understanding organizational objectives and customer needs), Service Design (turns the service strategy into a plan for delivering the business objectives), Service Transition (develops and improves capabilities for introducing new services into supported environments), Service Operation (manages services in supported environments), and finally Continual Service Improvement (continually improving the effectiveness and efficiency of services and processes). ITIL has five certification levels consisting of Foundation, Practitioner, Intermediate, Expert, and Master. Training and testing for the certification can be obtained online or in person.
